

## **Donation of Unused Laboratory Personal Protective Equipment (PPE)**

**EHS staff are available during normal business hours to pickup any unused PPE that the research community may wish to voluntarily donate to the UVA health system.**

The purpose of this service is to:

- alleviate the workload on laboratories focused on reducing their operations to essential activities, and;
- support a critical need of our health system during this challenging time.

To request an EHS pickup of donated PPE, you may either:

Submit your request anytime through the online EHS waste pickup request form ([click here](#)), choosing 'other' for PPE item(s) to be picked up, or;

Call 2-4911 during normal business hours (8am-5pm, M-F)

- Be sure to identify the name of the PI, laboratory location (building, room #), and contact information for any questions. When using the online form, indicate 'PPE donation' in the comments box.
- Indicate where your donated items will be located in your laboratory and how they will be identified by EHS staff.
  - If space allows, place items near laboratory entrance and mark them with a "PPE Donation" sign. Please attempt to segregate and mark donated items so they are easily distinguished from other supplies.
  - If you have multiple items, please consolidate in a box if possible

- Please note that donated items will not be replaced by EHS, nor will unused items be returned due to logistical considerations. Thank you for your understanding.
